### Pre-monsoon (March – May, 2026) Precipitation Monitoring

Average precipitation monitoring of 20 stations: — Daily accumulated precipitation — Daily accumulated normal \*mm → millimeter

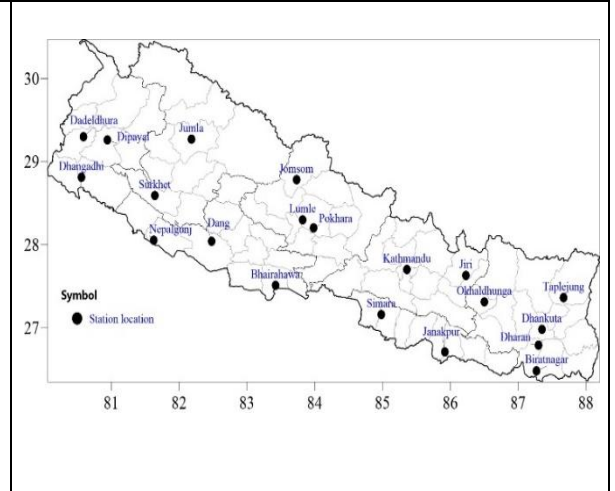

Figure: Blue solid line indicates the average of daily accumulated normal precipitation of 20 stations during Pre-monsoon season and purple solid line indicates the average of daily accumulated precipitation.

Map: Location map of 20 stations used in the report.

Precipitation Monitoring of individual stations:

Government of Nepal

**Climate Division (Climate Analysis Section)**  
Babarmahal, Kathmandu

— Daily accumulated precipitation — Daily accumulated normal \*mm → millimeter

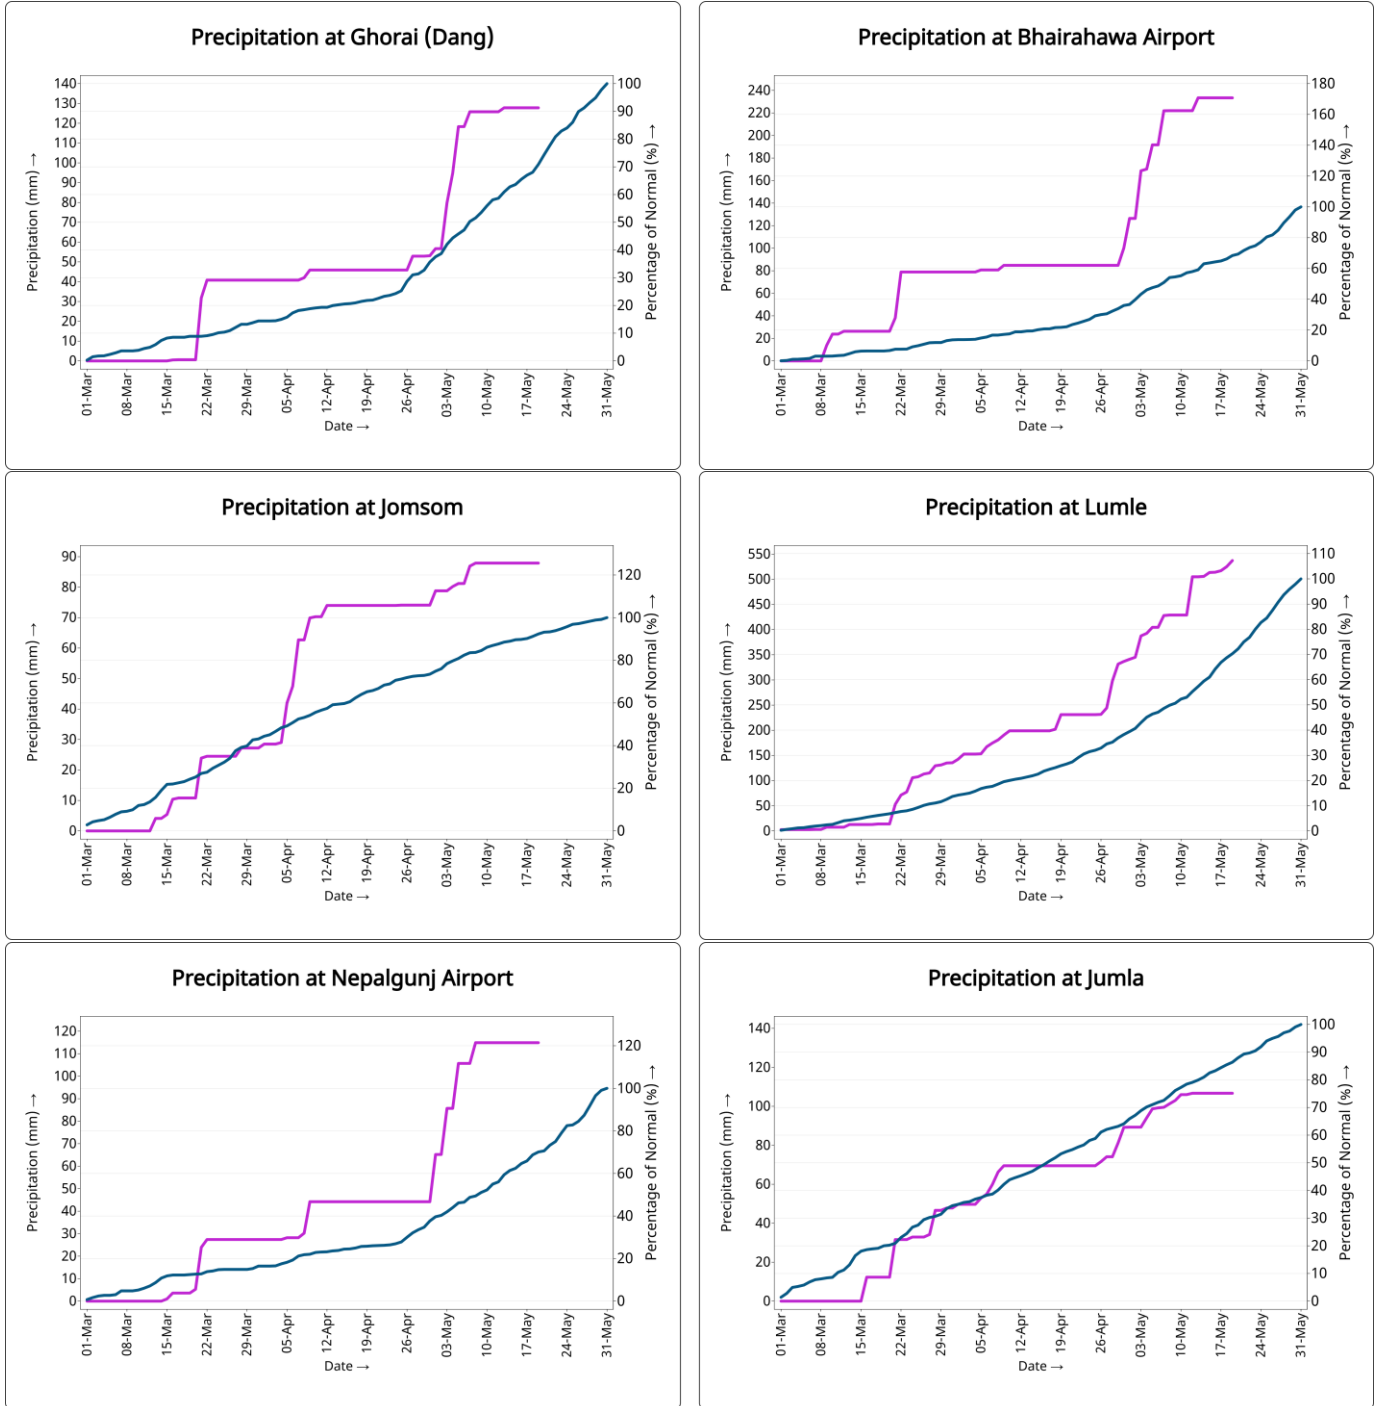

Figure: The blue lines in the above graphs indicate daily accumulated normal precipitation during Pre-monsoon season. Normal rainfall is the average of precipitation over 30 years period from 1991 -2020 and purple lines in above graphs indicate the daily accumulated precipitation of this Pre-Monsoon season
